Digital News Report 2025

The most comprehensive study of news consumption worldwide

<https://reutersinstitute.politics.ox.ac.uk/digital-news-report/2025>

Overview

This year's report comes at a time of deep political and economic uncertainty, changing geo-political alliances, not to mention climate breakdown and continuing destructive conflicts around the world.

Against that background, evidence-based and analytical journalism should be thriving, with newspapers flying off shelves, broadcast media and web traffic booming. But we find traditional news media struggling to connect with much of the public, with declining engagement, low trust, and stagnating digital subscriptions. | [Start reading](#)

TIKTOK & EU

- In the European Union, TikTok has been the subject of investigations and legal action over concerns about data security and influence in electoral processes.
- To address data security concerns, TikTok implemented "Project Clover", working with NCC Group, an independent cybersecurity firm, to monitor data flows and ensure that only authorized employees have access to them. The company says it has not and will not pass data to Chinese authorities, even if asked to do so.
- In December 2024, the European Commission launched an investigation into TikTok, suspecting that the platform was used to influence Romania's presidential election. It is alleged that foreign actors used TikTok to promote a pro-Russian candidate, which led to the annulment of the first round of voting by Romania's Constitutional Court. The investigation focuses on how TikTok manages the risks of content manipulation and policies on political advertising to determine whether the platform violated the EU's Digital Services Regulation.
